

Organizing committee: “Is it all set for the workshop?”

SysAdmin: “Sure, the server is up and running!”

The first day of the workshop:

Contingency plan:

1. Visit: <https://sandbox.bio/> and make an account.
2. Run the following tutorial on your web-browser

Tutorial 1 <https://sandbox.bio/tutorials?id=terminal-basics>

Tutorial 2 <https://sandbox.bio/tutorials?id=awk-intro>

Contingency plan:

3. During the night we have rebuilt a new cloud server.

Your user_ID, ssh-key, and key~passphrase stay the same.

You need to change the IP address either in the ssh command or in the putty session.

New host name for the ssh command:

ec2-13-48-67-124.eu-north-1.compute.amazonaws.com

New IP address for putty;

https://github.com/a-karma/Bogor_Workshop/blob/main/DAY_1/Session1.md

Contingency plan:

4. After connecting, please attempt to do our tutorials.

You can find them on my git-hub page:

Tutorial 1

https://github.com/a-karma/Bogor_Workshop/blob/main/DAY_1/Session1.md

Tutorial 2

https://github.com/a-karma/Bogor_Workshop/blob/main/DAY_1/Session2.md
